

## Amazing Traffic Generating Formula

# How I Got 527 Visitors To View 5,200+ Pages On My Site Within 72 Hours - And Made \$47.32 WITHOUT Selling Anything

And How **You Too Can Do It** - Week After Week -  
If You Have 30 Minutes To Spare!

*Yes, that's all it will take you...*

**30 Minutes A Week!**

And using this formula, you can drive a flood of traffic to your site and make a passive income entirely from displaying Pay per Click ads on the page.

Or you could **EXPLODE your profit** by adding MORE income streams to your system... **and multiply your results!**

If you are curious to learn the exact strategy I adopted to do it, [click here to skip to the end](#) of this report. I've attached my short account of the step by step process I followed. After reading it, come back here and continue.

....

Back already? Great.

Maybe you're convinced this simple system will work for you... it's really as easy as falling off a log :)

But maybe you're NOT yet sure. Maybe you doubt it it will work for you. Maybe you think I did it because of a large list, or superior marketing, or by having a popular website.

Sure, those things helped. But the strategy I'm about to reveal will show you how YOU can do it - even if you don't have a list, even if you don't have marketing knowledge or experience, even if you don't yet have a content-rich website.

Would you like that? Great. Now learn forward and listen carefully.

Here's the plan in a nutshell...

**Step #1 - Write a 'killer' article - or have one written for you**

**Step #2 - Build a content-rich website with your income streams plastered over it**

**Step #3 - Have your article published on hundreds of websites, directories and ezines**

**Step #4 - Sit back and relax as traffic explodes at your site and the cash rolls in!**

***"Whoa! Just a Minute"***

*"You said this was going to be quick and EASY!  
But this 4 step system sounds like a lot of work!"*

Well, it is. But not the way I tell you to do it. You see, I've got a 'SYSTEM' A formula to make it easy. VERY easy. All you need is the right tools. Let's take it step by step - and you'll see what I mean.

## Step #1 - Write Your 'Killer' Article

Hard work? Not really. I created a 22-part tutorial on this exact subject. [Read it here](#). You'll see how simple it can be to create and profit from articles.

## Step #2 - Promote Your Article

Isn't that hard to do? Sure. If you do it the hard way! There are hundreds of article directories, and thousands of ezines that accept articles - Take a look in the 'Directory of Ezines'.

Submitting to each by hand is hard, time-consuming work. Yes, you could hire someone to do it for you. Or go with a submission service like PhantomWriters.com

But the smartest way is to use an amazing new tool my friend Jason Potash has just released called "[Article Announcer](#)" - you can [get details here](#)

It will automatically submit your article to hundreds of article directories and ezines - AUTOMATICALLY. It will save you hours of time and a lot of effort.

## Step #3 - Build Content-Rich Minisites

But what about the content websites? Surely it will take hours - if not WEEKS - to come up with valuable content?

Not really. I have a solution for that too. In a brand new program I just opened up to members, I'm offering you 7 new articles on different popular niche topics - EVERY WEEK!

All 7 articles are available in text-only AND Web-ready format for you to simply slap on your links and ads, then load onto your web host!

Learn more about it and sign up here - [www.InstantNicheNews.com](http://www.InstantNicheNews.com)

## Step #4 - Sit Back & Relax

I can't help you with that... but

***I Guess You'll Manage That Just Fine!***

:-)

## Building A HOT Niche Minisite

There are a few things better for a business than an eager audience. If you find a crowd that WANTS what you're offering, your business success is much more likely.

So, before doing anything else, see what your audience is interested in.

You could ask them. Or see where they are gathering, what they are doing, the questions they're asking, the other stuff they're buying or reading or searching for... and get a pretty good idea.

My target market is online marketers. They are looking for ways to drive qualified traffic to their websites where they will find ways to convert them to customers.

The minisite I built was focused on teaching a way to get MORE traffic from one of the most popular methods to advertise a business online - Pay Per Click Search Engines.

The hottest PPC service is Google Adwords. So I chose to 'theme' my minisite on it, and share 'tips' that make a Google Adwords advertising campaign more effective, delivering more clicks for lower cost.

The site itself doesn't have to be complex. See for yourself.

<http://www.PPC-Secrets.com/adwords/>

It isn't hard to write a few lines about a strategy you've used - and experienced excellent results from.

## **Keep Them On Your Site By Adding Value**

A buzz word some years ago used to be 'stickiness'. It's a measure of how long you retain visitors to your site. Indirectly, it indicates how 'valuable' they find your site.

When you offer your visitors something of value, they are likely to hang around and consume it.

By breaking up your content into smaller chunks, or presenting it in the form of a series of tips, or a multi-part sequence, you entice your visitor to stick around a bit longer.

### **Why should you do this?**

Because the longer they stay, the more value they see on your page, the more likely they are to view OTHER stuff on your page positively.

If you host ads for a product on the page, your visitors who have been favorably impressed by the quality of your content will consider your 'ads' to be valuable too - and are 3.5 times more likely to click on them.

Or if you recommend another 'advanced' book or course, chances are they'll consider buying it - or at least checking it out - because you've gained 'expert status' in their mind.

## Drive Targeted Traffic To The Minisite

This can be easy - or VERY difficult... depending upon how you go about it! Sadly, most web marketers don't do it the right way.

When you select the niche to go after, have identified your ideal prospects, and know where to find them, driving a flood of traffic to your site is a piece of cake.

For this minisite, I used 2 methods of promotion:

- \* a mailing to my list of around 3,000 marketers
- \* a post on a popular marketing discussion forum

That's all. 2 short notes, mentioning that I had created a valuable resource revealing some powerful 'secrets' guaranteed to boost Google Adwords response rates.

Here's a copy of the email I sent my list

**SUBJECT: I want to give you something VERY valuable.**

It's stuff I've invested a lot of time and money on testing and learning myself. It's about some POWER tips to profit from Google Adwords.

It's as relevant to any form of ad copywriting, headline creation, crafting webpage sales copy ... or just about any other aspect of online marketing.

Even OFFline marketing, when you come to think of it.

## Find Ways To Turn The Traffic Into Profit

A flood of traffic isn't valuable by itself. What matters is what you do with the visitors who hit your site.

It would be good to convert them into 'buyers' - people who spend money buying stuff from you, or clicking on your PPC ads

It would be great to get them on your opt-in list - so you can build a relationship over time, and then sell them something. And then do it over and over again, many times.

It would be a waste if they did neither!

With this minisite, I set up 3 income streams:

- \* Google AdSense ads - I get paid when visitors click on them
- \* Perry Marshall's ebook - I get paid if visitors buy a copy
- \* My own Adwords ads - I get paid if visitors order using the links

Easy. Effective. Fast.

So design your minisite to maximize your response. Often this involves testing and tweaking your process. I've got many years of experience with this, and still made a silly mistake!

Here's what I did. After 'Tip #14', I directed the visitor back to 'Tip #1' (the first page). Instead, I could have replaced the last link with an affiliate link to an Adwords course I was recommending - and I'm sure many readers would have clicked through to the sales page.

*I missed out on potentially 250 clicks!*

So the lesson is never to become complacent. Test everything. See what works and keep doing it. Stop what doesn't work and change it or replace it with something that works better.

Slowly, steadily, your results will improve - and soon you'll find your site turning a profit effortlessly.

## What's Your Next Step?

You have 2 choices.

**You can build a site like this one in your own niche.** It is easy!

Think about what your target audience wants. See if you can help them answer a question or solve a problem or find a cure for what worries them.

Then build a simple website. Load it with ways to convert visitors to subscribers, buyers, or responders. Drive targeted traffic to the site. Track response and test variations until you find what works best.

### And Keep Doing More Of It!

Your other choice is to **get a copy of this 'Google Adwords' minisite** - and use it to attract visitors and generate an income stream.

I've decided to offer limited 'rebranding rights' to the **FIRST 97** people who want it - for a very affordable **\$9.95** payment.

*Your affiliate link will be inserted into the Google AdSense links and the 'Recommended eBook' featured on each page.*

Considering I made over 3 times that much from the site in the first 24 hours alone, this is a great deal - but this is NOT about money, and more about getting you started on a path to increasing online success.

Once you experience success with an online marketing tactic - even if it is a small victory - something magical happens.

### You Become CONFIDENT

And with that confidence, nothing will hold you back. So if you're ready to invest \$9.95 to get that 'boost', go ahead and click here.

I wish you all success in your online marketing
